FY 2017 ICD-10-CM Code Updates

Webinar I

Presented by: Melanie Endicott, MBA/HCM, RHIA, CHDA, CDIP, CCS, CCS-P, FAHIMA
AHIMA- Approved ICD-10-CM/PCS Trainer
Senior Director, HIM Practice Excellence, AHIMA
This webinar will cover:

Chapter 1: Certain Infectious & Parasitic Diseases
Chapter 2: Neoplasms
Chapter 3: Diseases of the Blood & Blood-forming Organs & Certain Disorders Involving the Immune Mechanism
Chapter 4: Endocrine, Nutritional, & Metabolic Diseases
Chapter 5: Mental, Behavioral & Neurodevelopmental Disorders
FY 2017 ICD-10-CM Code Updates

• What do the code updates include?
  – New, revised, and deleted codes and descriptions
  – Index revisions – not all related to new codes
  – Tabular revisions
    • Includes notes
    • Excludes notes
    • Use additional code notes
• The Official ICD-10-CM Guidelines for Coding and Reporting
Excludes Notes

Excludes1: Means **NOT CODED HERE**
Code being excluded is never used with the other code. The two conditions cannot occur together

**Example:**

**R53.1 Weakness**

Asthenia NOS

Excludes1:

- age-related weakness (R54)
- muscle weakness (M62.8-)
- senile asthenia (R54)
EXCLUDES2 NOTES

Excludes2: Means **NOT INCLUDED** HERE

Excluded condition is not part of the condition represented by the code

*If patient has both conditions, both can be coded*

Example:

R94.7 Abnormal results of other endocrine function studies

Excludes2: abnormal glucose (R73.0-)
Application of 7th Character in Chapter 19

- **Initial Encounter**
  - Used while patient is receiving active treatment for condition

- **Subsequent Encounter**
  - Used for encounters after patient has received active treatment and is receiving routine care during healing or recovery phase

- **Sequela**
  - Used for complications/conditions that arise as a direct result of a condition
Fracture Classification

- Some fracture categories designate the specific type of open fracture based on the **Gustilo** open fracture classification.
- A fracture not indicated as displaced or nondisplaced should be coded to **displaced**.
- A fracture not designated as open or closed should be coded to **closed**.
Review of some basics

Fracture 7th Character

- A Initial closed
- B Initial open
- D Subsequent routine
- G Subsequent delayed
- K Subsequent nonunion
- P Subsequent malunion
- S Sequela

Chapter 19
Fracture Aftercare

• **Note:** The aftercare Z codes should not be used for aftercare for traumatic fractures. For aftercare of a traumatic fracture, assign the acute fracture code with the appropriate 7th character.
CHAPTER 1:
Certain Infectious and Parasitic Diseases (A00-B99)
Chapter 1: Infectious & Parasitic Diseases

• **Minor changes** to this chapter in both the Alphabetical Index and Tabular List

• **Category A41 Sepsis**
  – Sepsis NOS (A41.9) has been deleted from the Excludes1 note.
  – Coders should refer to Coding Guidelines for the intent of Excludes1.
• **Zika Virus – A92.5** has been added
  – It includes Zika Virus Fever, Zika Virus Infection and Zika Virus, NOS

• **Chronic Viral Hepatitis, B18.1 – B18.9**, includes Carriers of Viral Hepatitis.
  – Code Z22.50-Z22.59 has been deleted and reclassified to this code category
Hepatitis, acute, infectious B15.9 changed to B17.9
CHAPTER 2:
Neoplasms (C00-D49)
Chapter 2: Neoplasms

New Codes
- C49.A0-C49.A9 for Gastrointestinal Stromal Tumors
- D47.Z2 for Castleman Disease
- D49.511-D49.59 for Neoplasm of Unspecified Behavior of Kidney

Instructional Note Changes
- C61 Malignant Neoplasm of prostate
- C78 Secondary Malignant Neoplasm of Respiratory and Digestive Organs
- D16.4 Benign Neoplasm Of Bones Of Skull And Face
CHAPTER 3:
Diseases of the Blood & Blood-forming Organs & Certain Disorders Involving the Immune Mechanism (D50-D89)
Neutropenia and Pancytopenia

- D61. Other aplastic anemias and other bone marrow failure syndrome
  
  **Excludes1**: neutropenia (D70.-)

  D61.81 Pancytopenia
  
  - Excludes1 changed to an Excludes2 Note (see below for new note)

  **Excludes2**: pancytopenia (due to) (with) myelodysplastic syndromes (D46.-)
Revised Codes:

• D78.21 – D78.22  Postprocedural hemorrhage and hematoma of the spleen following a procedure on the spleen (D78.21) or other procedure (D78.22)

**The titles of the above codes were revised to remove ‘hematoma’ and apply only to hemorrhage; both now indexed separately**

New Codes:

• D78.31 Postprocedural hematoma of the spleen following a procedure on the spleen
• D78.32 Postprocedural hematoma of the spleen following other procedure
New Code Category:

• D89.40 Mast cell activation, unspecified
• D89.41 Monoclonal mast cell activation syndrome
• D89.42 Idiopathic mast cell activation syndrome
• D89.43 Secondary mast cell activation syndrome
• D89.49 Other mast cell activation disorder
Index changes:

- Osteomyelofibrosis D75.89
  - Revised to: D47.4

- Anticoagulant, circulating (intrinsic) D68.318
  - New subterm for iatrogenic D68.32
CHAPTER 4:

Endocrine, Nutritional, & Metabolic Diseases (E00-E89)
AHA Coding Clinic, 1st Quarter 2016

- According to the ICD-10-CM Official Guidelines for Coding and Reporting I.A.15 - the term “with” means “associated with” or “due to” when it appears in a code title, the Alphabetic Index, or an instructional note in the Tabular List.

• Interpretation is intended to be used for coding Diabetes with associated manifestations and/or conditions.

• The classification assumes a cause-and-effect relationship between Diabetes and certain diseases.
Osteomyelitis in Diabetes

• Code Exx.69- Other specified complication is assigned for Osteomyelitis in Diabetes

• The Diabetes main term in the index includes ‘with, osteomyelitis’ (E11.69)

• Osteomyelitis has a new subterm
  – in diabetes mellitus – see E08-E13 with .69
Diabetes “With” conditions:

• However, if the physician documentation specifies diabetes mellitus is **not** the underlying cause of the other condition, the condition should not be coded as a diabetic complication.

• When the coder is unable to determine whether a condition is related to diabetes mellitus, or the ICD-10-CM classification does not provide coding instruction, it is appropriate to query the physician for clarification so that the appropriate codes may be reported.
All of the Diabetes Mellitus codes with eye complications have been expanded to allow for the capture of laterality:

- Right
- Left
- Bilateral

**E08.33** Diabetes mellitus due to underlying condition with moderate nonproliferative diabetic retinopathy

One of the following 7th characters is to be assigned to codes in subcategory E08.33 to designate laterality of the disease:

- 1 - right eye
- 2 - left eye
- 3 - bilateral
- 9 - unspecified eye
Diabetic eye conditions created to include traction retinal detachment “other types” with combination codes

- **E083539** Diabetes mellitus due to underlying condition with proliferative diabetic retinopathy with traction retinal detachment not involving the macula, unspecified eye
- **E083541** Diabetes mellitus due to underlying condition with proliferative diabetic retinopathy with combined traction retinal detachment and rhegmatogenous retinal detachment, right eye
- **E083542** Diabetes mellitus due to underlying condition with proliferative diabetic retinopathy with combined traction retinal detachment and rhegmatogenous retinal detachment, left eye
- **E083543** Diabetes mellitus due to underlying condition with proliferative diabetic retinopathy with combined traction retinal detachment and rhegmatogenous retinal detachment, bilateral
- **E083549** Diabetes mellitus due to underlying condition with proliferative diabetic retinopathy with combined traction retinal detachment and rhegmatogenous retinal detachment, unspecified eye
- **E083551** Diabetes mellitus due to underlying condition with stable proliferative diabetic retinopathy, right eye
- **E083552** Diabetes mellitus due to underlying condition with stable proliferative diabetic retinopathy, left eye
- **E083553** Diabetes mellitus due to underlying condition with stable proliferative diabetic retinopathy, bilateral
- **E083559** Diabetes mellitus due to underlying condition with stable proliferative diabetic retinopathy, unspecified eye
- **E083591** Diabetes mellitus due to underlying condition with proliferative diabetic retinopathy without macular edema, right eye
- **E083592** Diabetes mellitus due to underlying condition with proliferative diabetic retinopathy without macular edema, left eye
- **E083593** Diabetes mellitus due to underlying condition with proliferative diabetic retinopathy without macular edema, bilateral
• E16.0 – E16.2 new Excludes1 note

• New Use Additional Code (UAC) note at E08, E09, E11, E13
  – Use additional code to identify control using:
    • Insulin (Z79.4)
    • Oral antidiabetic drugs (Z79.84)
    • Oral hypoglycemic drugs (Z79.84)
Latent Autoimmune Diabetes of Adults (LADA)

• Latent autoimmune diabetes in adults (LADA) is a relatively new term for a type of diabetes. Although LADA more closely resembles type 1 diabetes, it can often be misdiagnosed as type 2 diabetes by health care providers who don't specialize in diabetes care. Providers have been taught that most people who develop type 1 are typically younger than age 30.

• Latent, Pre-diabetes Mellitus R73.09
  • Revised to: R73.03

E78.0  Hypercholesterolemia expanded

Unique codes for both Pure and Familial hypercholesterolemia

E78.00  Pure hypercholesterolemia, unspecified

E78.01  Familial hypercholesterolemia
Currently Hematoma is indexed under hemorrhage

• E89.810-E89.811 Description revised to remove hematoma and only include hemorrhage

• E89.820-E89.821 Postprocedural hematoma of an endocrine system organ or structure following an endocrine system procedure or following other procedure

• E89.822-E89.823 Postprocedural seroma of an endocrine system organ or structure following an endocrine system procedure or following other procedure
Chapter 4: Endocrine, Nutritional & Metabolic

- Coma, hyperglycemic (diabetic) see Diabetes, coma Revised to: Coma, hyperglycemia (diabetic) – see Diabetes, by type, with hyperosmolarity, with coma
CHAPTER 5

Mental, Behavioral, & Neurodevelopmental Disorders
(F01-F99)
Chapter 5: Behavioral Health

- F02 Dementia in diseases classified elsewhere
  - New Code first note

**Code first** dementia with Parkinsonism (G31.83)
Huntington's disease (G10)
prion disease (A81.9)
traumatic brain injury (S06.-)

**Excludes1**: dementia in Parkinsonism (G31.83) delete

F10.22 Alcohol Dependence with intoxication & F10.23 Alcohol with withdrawal

**Excludes1** notes changed to **Excludes2** notes
• Premenstrual dysphoric disorder (*PMDD*) N94.3
  – Revised to: Premenstrual dysphoric disorder (PMDD) F32.81 (new code)
• Disruptive Mood dysregulation disorder F34.81 – (disorder, disruptive, mood dysregulation)
• Expansion of F42 Obsessive-compulsive disorders (new codes)
  – Mixed obsessional thoughts and acts
  – Hoarding disorder
  – Excoriation (skin-picking) disorder
  – Other obsessive-compulsive disorders
• Binge eating disorder now has a new code - F50.81
  – Previously this was classified under ‘other’ eating disorders
• Transsexualism new code - F64.0
  – Previously was classified to F64.1 Gender identity disorder in adolescence & adulthood
  – F64.1 title changed to Dual role transvestism
  – New code F64.0 created
Main term “Alcohol” includes several new mental health disorders as subterms such as:

- **Anxiety disorder**: F10.980
- **Bipolar and related disorder**: F10.94
- **Depressive disorder**: F10.94
- **Major neurocognitive disorder, amnestic-confabulatory type**: F10.96
• Cocainism
  – Revised from: Cocainism – see Dependence, drug, cocaine to Cocainism – see Disorder, cocaine, use

• Delirium, delirious (acute or subacute) (not alcohol- or drug induced) (with dementia) R41.0
  – Subterm ‘due to (secondary to)’ has a new subterm index entry of:
    • Other (or unknown) substance: F19.921
• Dependence, PCP (phencyclidine)
  – See also note changed to see note
  • Revised from: Dependence, PCP (phencyclidine) (see also Abuse, drug, hallucinogen) F16.20
  • Revised to: Dependence, PCP (phencyclidine) (or related substance) – see Dependence, drug, hallucinogen)
    – The ‘default’ code at the subterm of PCP or Phencyclidine (PCP) has been removed.
    – See convention must be followed
• Disturbance, perpetual due to, phencyclidine F19.922 changed to F16.122
• Depression (acute) (mental) F32.9
  – Added subterm of ‘recurrent episode’ to the following subterms (all assigned F33.8):
    • Atypical
    • Climacteric
    • Involutional
    • Masked
    • Menopause
Disorder (of) – see also disease
  – Disorder includes several new index references, new
    main terms, subterm revisions and deleted terms
  • Some of the new index entries
    – Alcohol use
    – Amphetamine – type substance use
    – Amphetamine (or other stimulant) use
    – Anxiety
      » New sub term Illness F45.21
    – Autism spectrum F84.0
    – Binge eating F50.81
    – Caffeine use
    – Cannabis use
• Disorder, communication F80.9; has a new subterm index entry
  – Social pragmatic F80.82
• Disorder, conversion – see Disorder dissociative revised to conversion (functional neurological symptom disorder)
  – “With” was added under conversion as a subterm along with the addition of these subterms under ‘with’:
    • Abnormal movement F44.4
    • Anesthesia or sensory loss F44.6
    • Attacks or seizures F44.5
    • Mixed symptoms F44.7
    • Special sensory symptoms F44.6
    • Speech symptoms F44.4
    • Swallowing symptoms F44.4
    • Weakness or paralysis F44.4
• Intoxication has revised index entries that affect:
  – Caffeine (acute) (without dependence) – see Abuse, drug, stimulant, with intoxication F15.129
    • Revised to: caffeine F15.929
  – Cannabinoids (acute) (without dependence) – see Abuse, drug, cannabis, with intoxication
    • Revised to: cannabinoids (acute) (without dependence) – see Use, cannabis, with intoxication
    • Also two new subterms under cannabinoids, with,
      – Abuse and dependence
• Methadone use F11.20
  – Revised to: methadone use – see Use, opioid
• Psychosis, psychotic – see Disorder, mood
  – Revised to: manic-depressive – see Disorder, bipolar
• Attention Deficit disorder F90.0
  – Revised to  F98.8
• Disorder, disruptive behavior F98.9
  – Revised to: Disorder, disruptive behavior F91.9
• Disorder, dysmorphic body F45.1
  – Revised to: Disorder, dysmorphic body F45.22
• Menopause, menopausal (asymptomatic) (state), depression or melancholia, recurrent F33.9
  – Revised to: Menopause, depression or melancholia, recurrent F33.8
• Personality (disorder), mixed F60.81
  – Revised to: mixed (nonspecific) F60.89
• Disorder, psychological, associated with, uncertainty about gender identity F66
  – Revised to: uncertainty about gender identity F64.9
• State (of),
  – transient organic psychotic NEC, Hallucinatory type F06.30
    • Revised to: hallucinatory type F06.0
  – obsessional F42
    • Revised to: obsessional F42.8
• Tobacco (nicotine)
  – New subterm of abuse – see Tobacco, use
  – Tobacco, withdrawal state – see Dependence, drug, nicotine
    • Revised to: withdrawal state (see also Dependence, drug, nicotine) F17.203
Chapter 5: Behavioral Health

• Use (of), alcohol F10.99
  – Revised to: ICD-10-CM code Z72.89
• Use (of), methadone F11.20
  – Revised to: methadone – see Use, opioid
• Withdrawal state – several new subterms added
  – Alcohol
    • With perceptual disturbances F10.232
    • Without perceptual disturbances F10.239
  – Caffeine F15.93
  – Cannabis F12.288
Thank you for joining us for the FY 2017 ICD-10-CM Code Updates Webinar I!
FY 2017 ICD-10-CM Code Updates

This webinar will cover:

Chapter 6: Diseases of the Nervous System
Chapter 7: Diseases of the Eye and Adnexa
Chapter 8: Diseases of the Ear and Mastoid
Chapter 9: Diseases of the Circulatory System
Chapter 10: Diseases of the Respiratory System
Chapter 11: Diseases of the Digestive System
CHAPTER 6: Diseases of the Nervous System (G00-G99)
Chapter 6: Nervous System

• Mononeuropathies of upper limb (G56) and Mononeuropathies of lower limb (G57)
  – Codes in both categories expanded to capture ‘bilateral’ for example:
  
  Carpal tunnel syndrome, upper limb
  
  • Carpal tunnel syndrome, unspecified G56.00
  • Carpal tunnel syndrome, right G56.01
  • Carpal tunnel syndrome, left G56.02
  • Carpal tunnel syndrome, bilateral G56.03

New!
Chapter 6: Nervous System

- Postprocedural hemorrhage, hematoma and seroma of a nervous system organ or structure following a procedure (G97.5-)
  - Code title description (G97.5-) revised to only hemorrhage
  - New codes to uniquely identify
    - Hematoma (G97.61-G97.62)
    - Seroma (G97.63-G97.64)
• G40 – Epilepsy and recurrent seizures
  – the Excludes1 note was changed to an Excludes2 note

**Excludes2:**
- hippocampal sclerosis (G93.81)
- mesial temporal sclerosis (G93.81)
- temporal sclerosis (G93.81)
- Todd’s paralysis (G83.84)
• Meningoencephalitis, in (due to), Hemophilus influenzae (H. influenzae) G04.2
  – Revised to: G00.0
• Meningoencephalitis, pneumoccocal G00.1
  • Revised to: G04.2
• MNN (multifocal motor neuropathy) G61.82
  – New main term entry/new code
  – Also a sub entry of main term “Neuropathy, neuropathic”
• **Meningitis**
  – New subterm of Streptococcal pneumoniae G00.1 under meningitis, in,
  – Pneumococcal subterm changed to pneumococcal streptococcal pneumoniae (no code change)
  – Streptococcal (acute) index entry also has a new subterm entry Pneumoniae G00.1
Chapter 6: Nervous System

• Neuritis
  – Sub main term Gouty
    • Revised from: gouty M10.0 [G63]
    • Revised to: gouty (see also Gout, by type) M10.9 [G63]

• Neuroma
  – Subterm interdigital (toe) G58.8
    • Revised to: interdigital G58.8
    • The index entry interdigital, lower limb has also been revised
      – Revised from: lower limb G57.8-
      – Revised to: lower limb (toe) G57.8-
CHAPTER 7:
Diseases of the Eye & Adnexa (H00-H95)
Chapter 7: Diseases of the Eye & Adnexa

• Expanded and Added:
  – H34.8- Retinal Vascular occlusions
    • Added 7th character to describe severity of vein occlusion
    • Applicable to central and tributary retinal vein occlusions
    • One of the following 7th characters is assigned to codes in subcategory H34.81 to designate the severity of the occlusion
      0 with macula edema
      1 with retinal neovascularization
      2 stable
Expanded and Added:

- **H35.31** - Nonexudative age-related macular degeneration & **H35.32** - Exudative age-related macular degeneration
  - Added 6th character to describe laterality
  - Added 7th character to describe stage of macular degeneration

One of the following 7th characters is to be assigned to codes in subcategory H35.31 to designate the stage of the disease:
- 0 - stage unspecified
- 1 - early dry stage
- 2 - intermediate dry stage
- 3 - advanced atrophic without subfoveal involvement
  - advanced dry stage
- 4 - advanced atrophic with subfoveal involvement

- **H35.311** Nonexudative age-related macular degeneration, right eye
- **H35.312** Nonexudative age-related macular degeneration, left eye
- **H35.313** Nonexudative age-related macular degeneration, bilateral
- **H35.319** Nonexudative age-related macular degeneration, unspecified eye
Chapter 7: Diseases of the Eye & Adnexa

• Expanded and Added:
  – H40.11 - Primary open-angle glaucoma

• Added 6th character to describe laterality
• Added 7th character to describe stage

One of the following 7th characters is to be assigned to each code in subcategory H40.11 to designate the stage of glaucoma:

0 - stage unspecified
1 - mild stage
2 - moderate stage
3 - severe stage
4 - indeterminate stage

H40.111 Primary open-angle glaucoma, right eye
H40.112 Primary open-angle glaucoma, left eye
H40.113 Primary open-angle glaucoma, bilateral
H40.119 Primary open-angle glaucoma, unspecified eye
Chapter 7: Diseases of the Eye & Adnexa

- H53.041 – H53.049 Amblyopia suspect
- New & revised codes/descriptions for postprocedural hemorrhage and hematoma
  - H59.31- & H59.32- revised - postprocedural hemorrhage only
  - H59.33- & H59.34- postprocedural hematoma
  - H59.35- & H59.36- postprocedural seroma
- The postprocedural hemorrhage, hematoma and seroma codes denote laterality also
- Strabismus, cycloptropia H50.1
  - Revised to: H50.41
Chapter 8: Diseases of the Ear & Mastoid

Expanded and Added:

- H90.A11 thru H90.A32  New codes to reflect both conductive & sensorineural hearing loss with laterality and restriction
- H93.A-  New subcategory to reflect pulsatile tinnitus with laterality
- H95.4-  Revised so only captures postprocedural hemorrhage
- H95.5-  New subcategory to reflect postprocedural hematoma or seroma of ear and mastoid process

ahima.org/codeupdates
CHAPTER 9:
Diseases of the Circulatory System (I00-I99)
Chapter 9: Circulatory system

I16.- new Hypertension codes
  – Urgency (I16.0)
  – Emergency (I16.1)
  – Crisis (I16.2)

**Hypertensive crisis** occurs when BP rises fast enough & high enough that there is the potential for organ damage.
Chapter 9: Circulatory system

- Category I60.2 Deleted subcategory codes for specific communicating arteries (laterality)
- Categories I42, I50, I63, I67 Excludes1 notes revised to Excludes2 notes
- Code I63.-: Cerebral infarction
  - New “Use Additional Code” (UAC) note to indicate National Institutes of Health Stroke Scale (NIHSS) score (R29.7)
  - New codes created to specify bilateral arteries
  - Excludes1 notes revised to Excludes2 notes
Chapter 9: Circulatory system

- Code category I69.- New subcategory codes created to specify Cognitive Deficits following (sequela) cerebral hemorrhage, infarction, other or unspecified cerebrovascular diseases:

  - I69.01- nontraumatic subarachnoid hemorrhage
  - I69.11- nontraumatic intracerebral hemorrhage
  - I69.21- intracranial hemorrhage
  - I69.31- cerebral infarction
  - I69.81- other cerebrovascular disease
  - I69.91- unspecified cerebrovascular disease
Chapter 9: Circulatory system

• 6\textsuperscript{th} character descriptions for codes I69.01-, I69.11-, I69.21-, I69.31-, I69.81, I69.91-:
  – 0 Attention and concentration deficit
  – 1 Memory deficit
  – 2 Visuospatial deficit and spatial neglect
  – 3 Psychomotor deficits
  – 4 Frontal lobe and executive function deficit
  – 5 Cognitive social or emotional deficit
  – 8 Other symptoms and signs involving cognitive function
  – 9 Unspecified symptoms and signs involving cognitive function
Chapter 9: Circulatory system

New codes

• I72.5 precerebral artery aneurysm
• I72.6 vertebral artery aneurysm
• I77.70, I77.5 – I77.77 dissection of arteries expanded to include:
  – Unspecified, other precerebral, upper extremity, lower extremity arteries
• Code I97.6- Revised code descriptions for postprocedural hemorrhage and hematoma and added new codes for hematoma & seroma of the circulatory system.
Chapter 9: Circulatory system

• Clot, (blood), heart, not resulting in an infarction I24.0 (Acute coronary thrombosis not resulting in MI)
  – Changed to I51.3
• Moved from Other Acute Ischemia Heart Diseases to Complications and ill-defined descriptions of heart disease

I51.3 Intracardiac thrombosis, not elsewhere classified
- Apical thrombosis (old)
- Atrial thrombosis (old)
- Auricular thrombosis (old)
- Mural thrombosis (old)
- Ventricular thrombosis (old)

Excludes1: intracardiac thrombosis as current complication following acute myocardial infarction (I23.6)

ahima.org/codeupdates
• Angina, stable I20.9 changed to I20.8

• Deficit – several new subterms related to cerebral infarction, disease, hemorrhage
Chapter 10: Diseases of the Respiratory System (J00-J99)
Chapter 10: Diseases of the Respiratory System

New codes:
• Mediastinitis (J98.51)
• Postprocedural hematoma and seroma – J95.860-J95.863

Index changes:
• Pneumonia, nitrogen dioxide J68.9
  – Revised to: J68.0

Tabular change:
• J47.0 Bronchiectasis has a new UAC note
Chapter 11: Diseases of the Digestive System (K00-K95)
• Diseases of Oral Cavity and Salivary Glands (K00-K14)

  – Code K04.0 Pulpitis has been expanded into two new codes.
    – K04.01 Reversible pulpitis
    – K04.02 Irreversible pulpitis
Chapter 11: Digestive System

• Periodontitis
  – Codes have been created to specify the stage of periodontitis.

  • Stages:
    – Slight
    – Moderate
    – Severe
    – Unspecified
• Periodontal disease severity is diagnosed on the basis of clinical attachment loss (CAL), for either the entire dentition or for each affected tooth.

– Generally:

• **Slight** = 1-2 mm CAL,
• **Moderate** = 2-4 mm CAL
• **Severe** = > 5 mm CAL
Chapter 11: Digestive System

- K05.211-K05.219 Aggressive periodontitis, localized
- K05.221-K05.229 Aggressive periodontitis, generalized
- K05.311- K05.319 Chronic periodontitis, localized
- K05.321-K05.329 Chronic periodontitis, generalized
Deficiencies in the height or width of the alveolar ridge may now be reported using:

- New code K06.3 Horizontal Alveolar Bone Loss
- New inclusion term *Vertical ridge deficiency* has been added to code K06.8, Other specified disorders of gingiva and edentulous alveolar ridge
Chapter 11: Digestive System

- K08.8 Other specified disorders of teeth and supporting structures
  - The following Inclusion terms have been removed from code K08.8 and added to New Code K08.89
    - Enlargement of alveolar ridge NOS
    - Irregular alveolar process
    - Toothache NOS
  - Occlusal trauma:
    - K08.81 Primary occlusal trauma
    - K08.82 Secondary occlusal trauma
• K08.8 Other specified disorders of teeth and supporting structures
  – The following Inclusion terms have been removed from code K08.8 and added to New Code K08.89
    • Enlargement of alveolar ridge NOS
    • Irregular alveolar process
    • Toothache NOS
  – Occlusal trauma:
    • K08.81 Primary occlusal trauma
    • K08.82 Secondary occlusal trauma
• Noninfective enteritis and colitis (K50-K52)
  – Many new terms have been added to the ICD-10-CM index under main terms Allergy, allergic, Colitis, Enteritis, Enteropathy, Gastroenteritis, Protocolitis, and Syndrome, for the following new codes.
    • K52.21 Food protein-induced enterocolitis syndrome
    • K52.22 Food protein-induced enteropathy
    (cont’d)
Chapter 11: Digestive System

• Noninfective enteritis and colitis (K50-K52)
  – New Codes (cont’d)
    • K52.29 Other allergic and dietetic gastroenteritis and colitis
    • K52.3 Indeterminate colitis
    • K52.831 Collagenous colitis
    • K52.832 Lymphocytic colitis
    • K52.838 Other microscopic colitis
    • K52.839 Microscopic colitis, unspecified
Chapter 11: Digestive System

- Other diseases of intestines (K55-K64)
  - Code K55.0 Acute vascular disorders of intestine has had the following Inclusion terms removed from the ICD-10-CM 2017 tabular for this code.
    - Acute fulminant ischemic colitis
    - Acute intestinal infarction
    - Acute small intestine ischemia
    - Necrosis of intestine
    - Subacute ischemic colitis
• Other diseases of intestines (K55-K64)
  – The following new codes have been created for these conditions.
  • K55.011-K55.019-Acute (reversible) ischemia of small intestine
  • K55.021-K55.029-Acute (reversible) ischemia of small intestine
  – Includes:
    » Gangrene of small intestine
    » Necrosis of small intestine
Chapter 11: Digestive System

- Other diseases of intestines (K55-K64) new codes-
  - K55.041-K55.049 Acute infarction of large intestine
    - Includes:
      » Gangrene of large intestine
      » Necrosis of large intestine
  - K55.051-K55.059 Acute (reversible) ischemia of intestine, part unspecified
  - K55.061-K55.069 Acute infarction of intestine, part unspecified
    - Includes:
      » Acute intestinal infarction
      » Gangrene of large intestine
      » Necrosis of large intestine
New category K55.3 Necrotizing enterocolitis, has been created to identify this condition when it occurs outside the 0-28 day newborn period.

- K55.30 Necrotizing enterocolitis, unspecified
  Necrotizing enterocolitis, NOS
- K55.31 Stage 1 necrotizing enterocolitis
  Necrotizing enterocolitis without pneumatosis, without perforation
- K55.32 Stage 2 necrotizing enterocolitis
  Necrotizing enterocolitis with pneumatosis, without perforation
- K55.33 Stage 3 necrotizing enterocolitis
  Necrotizing enterocolitis with perforation
  Necrotizing enterocolitis with pneumatosis and perforation
• Irritable Bowel Syndrome (IBS)
  – New codes K58.1-K58.8 have been added to specify IBS with constipation, mixed type and other irritable bowel syndrome

K59.0 Constipation
– Added:
  • **Use Additional** code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)
• K59.0 Constipation
  – New Codes:
    • K59.03 Drug induced constipation
    • K59.04 Chronic idiopathic constipation
      – Including:
        » Functional constipation
  – Index changes:
    • Drug induced constipation (K59.03)
      – Previously directed the coder to - see the Table of Drugs and Chemicals.
      – Can now be found in the ICD-10-CM index under Constipation, Drug-induced
**Example:**

A 79 year old male who is currently prescribed Fentanyl to treat pain related to his primary prostate cancer which has metastasized to the bone; presents with the complaint of constipation. The doctor determines that the Opioid medication is the cause of the constipation.

**Diagnosis:** Drug induced Constipation due to Fentanyl was documented in the medical record.
• Question:
  – How is the Drug Induced Constipation coded?

• Answer:
  – Code K59.03 Drug induced constipation, may be assigned to report this condition. An additional code to identify the adverse affect of the Fentanyl, (T40.4X5-), may be assigned.
• Code K59.3
  – Inclusion term Toxic megacolon removed from this code in the ICD-10-CM tabular.
  – Code first note now indicates “if applicable” in this note.
• The following new codes have been created to represent Toxic Megacolon:
  – K59.31 Toxic megacolon
  – K59.39 Other megacolon
    • Includes: Megacolon NOS
For category K85 Acute pancreatitis, the following Inclusion terms have been deleted from the tabular list.

- Includes:
  - abscess of pancreas
  - acute necrosis of pancreas
  - gangrene of (gangrenous) pancreas
  - hemorrhagic pancreatitis
  - infective necrosis of pancreas
  - suppurative pancreatitis
Chapter 11: Digestive System

- New codes created to capture Acute Pancreatitis which now include with or without necrosis and/or infection
  - K85.00-K85.02 Idiopathic acute pancreatitis
  - K85.10-K85.12 Biliary acute pancreatitis
  - K85.20-K85.22 Alcohol induced acute pancreatitis
  - K85.30-K85.32 Drug induced acute pancreatitis
  - K85.80-K85.82 Other acute pancreatitis
  - K85.90-K85.92 Acute pancreatitis, unspecified
Many changes to the ICD-10-CM index entry for Acute Pancreatitis:

- Infection, infected, infective (opportunistic), pancreas (acute) K85.9
  - Revised to: see Pancreatitis, acute

- Infection, infected, infective (opportunistic), pancreas, specified NEC K85.8
  - Revised to- (see also Pancreatitis, acute) K85.80
New codes added to category K90 Intestinal malabsorption to differentiate gluten sensitivity from celiac disease:

- K90.41 Non-celiac gluten sensitivity
  - Gluten sensitivity NOS
  - Non-celiac gluten sensitive enteropathy
- K90.49 Malabsorption due to intolerance, not elsewhere classified
  - Malabsorption due to intolerance to carbohydrate
  - Malabsorption due to intolerance to fat
  - Malabsorption due to intolerance to protein
  - Malabsorption due to intolerance to starch
• New codes have been added to capture Postprocedural hematoma and seroma following a procedure:
  – K91.870 Postprocedural hematoma of a digestive system organ or structure following a digestive system procedure
  – K91.871 Postprocedural hematoma of a digestive system organ or structure following other procedure
  – K91.872 Postprocedural seroma of a digestive system organ or structure following a digestive system procedure
  – K91.873 Postprocedural seroma of a digestive system organ or structure following other procedure
• Notable tabular instructional note changes:
  – K72 Hepatic failure, not elsewhere classified
    • Delete Includes: acute hepatitis NEC, with hepatic failure
    • Delete Excludes1: viral hepatitis with hepatic coma (B15-B19)
    • Add Excludes2: viral hepatitis with hepatic coma (B15-B19)
• Notable tabular instructional note changes:
  – K76.7 Hepatorenal syndrome
  • Excludes1:
    – *Revise FROM* postprocedural hepatorenal syndrome (K91.82)
    – *Revise TO* postprocedural hepatorenal syndrome (K91.83)
• Notable tabular instructional note changes:
  – **New code also instructional note:**
    • Code also exocrine pancreatic insufficiency (K86.81)
      – added to codes:
      » K86.0 Alcohol-induced chronic pancreatitis
      » K86.1 Other chronic pancreatitis
Thank you for joining us for the FY 2017 ICD-10-CM Code Updates Webinar II!
FY 2017 ICD-10-CM Code Updates

Webinar III

Chapter 12: Diseases of the Skin & Subcutaneous Tissue (L00-L99)
• Added **Excludes 2 notes:**
  
  – L05.01  Pilonidal cyst and sinus with abscess
  
  – L05.91  Pilonidal cyst without abscess

  • Excludes 2:  congenital sacral dimple  
    (Q82.6)

  Parasacral dimple (Q82.6)

  • Excludes 2:  familial cold urticaria (M04.2)

  – L50.2  Urticaria due to cold and heat
Chapter 12: Skin & Subcutaneous Tissue

New Codes:

- L76.21-L76.22 revised to only Postprocedural hemorrhage
- L76.31 – L76.34 to reflect Postprocedural hematoma or seroma of skin and subcutaneous tissue
- L98.7 Excessive, loose & redundant skin & subcutaneous tissue
  - Index updated Redundant, skin has been L57.4. This was updated to L98.7
  - New entry under main term ‘Excessive’
• Periorbital cellulitis
  – New index entry and code L03.213
  – Currently AHA Coding Clinic 4th Qtr 2013 advice is to assign L03.211, Cellulitis of face for periorbital/preseptal cellulitis.
• Dermatitis, stasis new subterm for varicose veins
  - stasis I87.2
  - - with varicose ulcer - see Varix, leg, with ulcer, with inflammation
  - - with
  - - - varicose ulcer - see Varix, leg, with ulcer, with inflammation
  - - - varicose veins - see Varix, leg, with, inflammation
Chapter 13:
Diseases of the Musculoskeletal System & Connective Tissue (M00-M99)
New code category:

- M04.1 – M04.9: Autoinflammatory syndromes
  - Index changes for some conditions that will now be classified to this category such as:
    - Fever, periodic from E85.0 to M04.1
    - Urticaria, cold, familial L50.2 changed to M04.1
- M96.840 – M96.843: Postprocedural hematoma and seroma of the musculoskeletal system

ahima.org/codeupdates
Chapter 13: Musculoskeletal & Connective Tissue

New code category:
M97.01-M97.9: Periprosthetic fracture around prosthetic joint

- Previously classified as a complication of the joint prosthesis and assigned to T84 codes
- Index: Fracture, traumatic, joint, prosthesis, periprosthetic – see Complications, joint prosthesis, mechanical, periprosthetic, fracture, by site

- Revised to: See Fracture, pathological, periprosthetic
- New subterm of ‘periprosthetic’
Chapter 13: Musculoskeletal & Connective Tissue

New Code Category:

- M21.61- Bunion
  - Currently index instructs: see Deformity, toe, Hallux valgus; no separate code assigned, it’s included in the Hallus valgus code

- M62.5 Muscle wasting atrophy, NEC
  - Added: Excludes1: Sarcopenia (M62.84)

- M62.81 Muscle weakness (generalized)
  - Added: Excludes1: muscle weakness in Sarcopenia (M62.84)

- M62.84 new code for Sarcopenia
New codes & categories:

- M25.541 - M25.549 Pain in joints of hand
  - Includes specific codes for pain in joint of hand
  - Currently Pain, joint, hand indexed to M79.64-
- M50.- Cervical disc disorders
  - Expanded each code in the mid-cervical disc range to specify each level separately (C4-C7)
- M84.750-M84.759 Atypical femur fracture
  - Indexed under Fracture, nontraumatic, atypical, femur
  - 7th characters are assigned
Alphabetical Index Changes:

- Fracture, pathological, due to, osteoporosis M80.80 changed to M80.00
- Fracture, pathological – new subterm of ‘compression’
  - Fracture, pathological, compression (not due to trauma) – see also Collapse, vertebra M48.50-
- Iritis, gouty M10.9
  - Revised to: (see also Gout by type) M10.9 [H22]
Chapter 13: Musculoskeletal & Connective Tissue

• Neuritis (rheumatoid) gouty M10.00 [G63]
  – Revised to: (see also Gout, by type) M10.9 [G63]

• Nonunion – new subterm; joint following fusion or arthrodesis M96.0

• Synovitis now has a ‘default’ code of M65.9

• Synovitis, gouty see Gout, idiopathic M10.00
  – Revised to: Synovitis, gouty see Gout M10.9
Chapter 14: Diseases of the Genitourinary System (N00-N99)
Chapter 14: Diseases of the Genitourinary System

- Added subcategory
  - N13.0: Hydronephrosis with Ureteropelvic Junction Obstruction
    - Hydronephrosis due to Acquired Occlusion of Ureteropelvic Junction
    - Excludes 2: Hydronephrosis with Ureteropelvic Junction Obstruction due to Calculus (N13.2)

Hydronephrosis (atrophic) (early) (functionless) (intermittent) (primary) (secondary) NEC N13.30
- with
  -- obstruction (by) (of)
    --- ureteropelvic junction (congenital) Q62.0
    ---- with infection N13.6
    ----- acquired N13.0
    ------ with infection N13.6

ahima.org/codeupdates
New codes:

- N39.491 - N39.492: Coital & Postural Urinary Incontinence
- N42.30 – N42.39: Specific types of Prostatic Dysplasia
- N50.81 – N50.89: expanded code N50.8
  – N50.811-N50.819 Testicular Pain – includes laterality
  – N50.82 Scrotal Pain
New Codes cont’d:

- N52.35 - N52.37: Erectile Dysfunction following radiation, interstitial seed and ablative therapies
- N61.0: Mastitis without abscess
- N61.1: Abscess of the breast & nipple (mastitis with abscess)
- N83.00 – N83.529: Noninflammatory disorders of ovary, fallopian tube & broad ligament
  – Laterality added in new codes
Chapter 14: Diseases of the Genitourinary System

New Codes cont’d:

• N93.1: Pre-pubertal Vaginal Bleeding
• N94.10 - N94.19: Dyspareunia (specified types)
• N99.523 Herniation of external incontinent stoma
• N99.524 Stenosis of incontinent stoma
• N99.533 Herniation of continent stoma
• N99.534 Stenosis of continent stoma
• N99.840 - N99.843: Postprocedural Hematoma and Seroma of genitourinary system
Chapter 14: Diseases of the Genitourinary System

- **Tabular** - Added Excludes1 notes:
  - N36.8 Other specified disorders of urethra
    - Add: Excludes1: Congenital urethrocele (Q64.7) Female urethrocele (N81.0)
  - N94.3 Premenstrual tension syndrome
    - Add: Excludes1: Premenstrual dysphoric disorder (F32.81)
Chapter 14: Diseases of the Genitourinary System

• **Index Changes:**

  – Bacilluria and Bacteriuria N39.0 (UTI)
    • Revised to: R82.71 (new code)
  – Premenstrual dysphoric syndrome N94.3 (Premenstrual tension syndrome)
    • Revised to: F32.81 (new code)
  – Urinary urgency N39.41 (urge incontinence)
    • Revised to: R39.15 (urgency of urination)
• The category note at the beginning of Chapter 15 instructs the coder to:
  – **Use Additional** code from category Z3A, Weeks of gestation, to identify the specific week of the pregnancy has been changed to include the term “if known”
  – The new Use Additional note now reads:
    • **Use Additional**: code from category Z3A, Weeks of gestation, to identify the specific week of the pregnancy, *if known*.
• **Coding Clinic, Third Quarter 2014: Page 17**, clarifies the use of this use additional note for category Z3A, weeks of gestation, when the pregnancy results in an abortive outcome.

  – **NOTE**: THIS INSTRUCTION HAS NOT CHANGED and states.

    “Codes in category Z3A, Weeks of gestation are not applicable, and should not be assigned if the pregnancy is outside of the uterus or otherwise nonviable (categories O00-O02).”
• Category O00, Ectopic Pregnancy
  – New codes have been added to indicate whether the Ectopic pregnancy was with or without Intrauterine pregnancy, see codes:
    • O00.00-O00.01 Abdominal pregnancy
    • O00.10-O00.11 Tubal pregnancy
    • O00.20-O00.21 Ovarian pregnancy
    • O00.80-O00.81 Other ectopic pregnancy
    • O00.90-O00.91 Ectopic pregnancy, unspecified
Chapter 15: Pregnancy, Childbirth & the Puerperium

• Category O09 Supervision of high risk pregnancy
  – New codes have been created to separate ectopic from the molar pregnancy codes:
    • O09.A0 Supervision of pregnancy with history of molar pregnancy, unspecified trimester
    • O09.A1 Supervision of pregnancy with history of molar pregnancy, first trimester
    • O09.A2 Supervision of pregnancy with history of molar pregnancy, second trimester
    • O09.A3 Supervision of pregnancy with history of molar pregnancy, third trimester
Category O10-O16 Edema, proteinuria and hypertensive disorders in pregnancy, childbirth and the puerperium have added the following new codes to report conditions complicating **childbirth and the puerperium**:

- O11.4-O11.5 Pre-existing hypertension with pre-eclampsia
- O12.04-O12.05 Gestational edema
- O12.14-O12.15 Gestational proteinuria
- O12.24-O12.25 Gestational edema with proteinuria
Chapter 15: Pregnancy, Childbirth & the Puerperium

• New codes to report conditions complicating *childbirth and the puerperium* for category O10-O16 (cont’d):
  – O13.4-O13.5 Gestational [pregnancy-induced] hypertension without significant proteinuria
  – O14.04-O14.05 Mild to moderate pre-eclampsia
  – O14.14-O14.15 Severe pre-eclampsia
  – O14.24-O14.25 HELLP syndrome
  – O14.94-O14.95 Unspecified pre-eclampsia
Chapter 15: Pregnancy, Childbirth & the Puerperium

• Pregnancy complicated by eclampsia category O15 changes:
  – Changes were made to codes O15.00-O15.03 to:
    • Remove the terms “in pregnancy”
    • Add the terms “complicating pregnancy”
  – For example:
    • Eclampsia code O15.00 was revised:
      – From: O15.00 Eclampsia in pregnancy, unspecified trimester
      – To: O15.00 Eclampsia complicating pregnancy, unspecified trimester

(cont’d)
Chapter 15:
Pregnancy, Childbirth & the Puerperium

• Pregnancy complicated by Eclampsia category O15 changes (cont’d):
  – Similar changes were made to Eclampsia codes O15.1-O15.2 to revise:
    • From: O15.1 Eclampsia in labor
      – To: O15.1 Eclampsia complicating labor
    • From: O15.2 Eclampsia in the puerperium
      – To: O15.2 Eclampsia complicating the puerperium
Chapter 15: Pregnancy, Childbirth & the Puerperium

• O24.4 Gestational diabetes mellitus changes:
  – New codes:
    • O24.415 Gestational diabetes mellitus in pregnancy, controlled by oral hypoglycemic drugs
    • O24.425 Gestational diabetes mellitus in childbirth, controlled by oral hypoglycemic drugs
    • O24.435 Gestational diabetes mellitus in puerperium, controlled by oral hypoglycemic drugs
  • Oral antidiabetic drug examples:
    – Avandia
    – Metformin
    – Januvia
• Category O33.7 Maternal care for disproportion due to other fetal deformities, has expanded to include 7th characters to designate the specific fetus with the deformity causing the disproportion
  
  0 not applicable or unspecified
  1 fetus 1
  2 fetus 2
  3 fetus 3
  4 fetus 4
  5 fetus 5
  9 other fetus
Chapter 15: Pregnancy, Childbirth & the Puerperium

- Category O34.2, Maternal care due to uterine scar from previous surgery, has new codes added to specify the type of cesarean scar.
  - O34.211 Maternal care for low transverse scar from previous cesarean delivery
  - O34.212 Maternal care for vertical scar from previous cesarean delivery
    - Including:
      - Maternal care for classical scar from previous cesarean delivery
    - O34.219 Maternal care for unspecified type scar from previous cesarean delivery
• New ICD-10-CM index subterms have been added for category O34.2, Maternal care due to uterine scar from previous surgery.

• For example:

  – Cesarean delivery, previous, affecting management of pregnancy O34.219

  • Add- classical (vertical) scar O34.212
  • Add- low transverse scar O34.211
Chapter 15: Pregnancy, Childbirth & the Puerperium

• Category O42 Premature rupture of membranes changes:
  – The inclusion terms for codes O42.02, O42.12, and O42.92 have been revised:
    • From: Premature rupture of membranes after 37 completed weeks of gestation
    • To: Premature rupture of membranes at or after 37 completed weeks of gestation, onset of labor more than 24 hours following rupture
Chapter 15: Pregnancy, Childbirth & the Puerperium

• Codes in category O44 Placenta previa have been revised to add the term “NOS” to the code descriptions:
  – For example: Category code O44.00 has been revised:
    • From: O44.0 Placenta previa specified as without hemorrhage
    • To: O44.0 Complete placenta previa NOS or without hemorrhage
  – The inclusion notes have also been revised:
    • Delete Low implantation of placenta specified as without hemorrhage
    • Add Placenta previa NOS
New codes have been added to capture:

- O44.20-O44.23 Partial placenta previa without hemorrhage
  - Including:
    - Marginal placenta previa, NOS or without hemorrhage
- O44.30-O44.33 Partial placenta previa with hemorrhage
  - Including:
    - Marginal placenta previa with hemorrhage
- O44.4 Low lying placenta NOS or without hemorrhage
  - Including:
    - Low implantation of placenta NOS or without hemorrhage
Chapter 15: Pregnancy, Childbirth & the Puerperium

• New codes have been added to capture:
  – O44.5 Low lying placenta with hemorrhage
    • Including:
      – Low implantation of placenta with hemorrhage
  – O70.20 Third degree perineal laceration during delivery, unspecified
  – O70.21 Third degree perineal laceration during delivery, IIa
    • Including:
      – Third degree perineal laceration during delivery with less than 50% of external anal sphincter (EAS) thickness torn
Chapter 15: Pregnancy, Childbirth & the Puerperium

• New codes have been added to capture:
  – O70.22 Third degree perineal laceration during delivery, IIIb
    • Including:
      – Third degree perineal laceration during delivery with more than 50% external anal sphincter (EAS) thickness torn
  – O70.23 Third degree perineal laceration during delivery, IIIc
    • Including:
      – Third degree perineal laceration during delivery with both external anal sphincter (EAS) internal anal sphincter (IAS) torn
• Tobacco use in pregnancy (O99.3) Use Additional instruction has been revised to specify:

  – **Use additional:**
    
    • Code from category F17 to identify type of *tobacco nicotine dependence*

  – Previously, this same Use Additional note prompted the coder to additionally assign ANY code from the F17 category to identify the type of tobacco

*ahima.org/codeupdates*
Chapter 15: Pregnancy, Childbirth & the Puerperium

• The ICD-10-CM index entries for placenta previa have been revised:

  No Change Delivery (childbirth) (labor)
  No Change - cesarean (for)
  Revise from - - placenta previa O44.1-
  Revise to - - placenta previa O44.0-
Chapter 15: Pregnancy, Childbirth & the Puerperium

Alphabetical Index changes:

• Embolism, obstetric O88.81-O88.83
  – Revised to: O88.21-O88.23

• Hypertension, complicating childbirth O10.92
  – Revised to: O16.4

• Hypertension, puerperium, pre-existing O10.93
  – Revised to: O16.5

• Hypopituitarism, postpartum E23.0
  – Revised to: O99.285

• Pregnancy, complicated by, abnormal, bicornis or bicornuate uterus O34.59-
  – Revised to: O34.0-
• A new Excludes1 note has been added to code O99.82 Streptococcus B carrier state complicating pregnancy, childbirth and the puerperium, to prohibit the use of code Z22.330 for obstetrical patients.
  – Excludes1: Carrier of streptococcus group B (GBS) in a nonpregnant woman (Z22.330)
Chapter 16:
Certain Conditions Originating in the Perinatal Period (P00-P96)
New Instructions - Removed “Suspected Conditions” from NOTE at P00-P04 in the tabular

- Removal of “suspected” verbiage from all code descriptions in P00-P04

- Codes from this category can be used for conditions not “ruled-out”
New Code Category – Z05 Encounter for Observation and Evaluation of Newborn for Suspected diseases and conditions \textbf{ruled out}

- Z05.0 - Cardiac
- Z05.1 - Infectious
- Z05.2 – Neurological
- Z05.3 – Respiratory
- Z05.41 - Genetic
- Z04.42 – Metabolic
- Z04.43 – Immunologic
- Z05.6 - Gastrointestinal
- Z05.71 – Skin and Subcutaneous Tissue
- Z05.72 - Musculoskeletal
- Z05.73 – Connective Tissue
- Z05.8 - Other
- Z05.9 - Unspecified
Case Scenario

At birth, a newborn is evaluated for septic workup. At discharge, the attending physician documents, a final diagnosis of “Sepsis, ruled out”.

Answer: Assign the appropriate Newborn code and in addition, add code Z05.1 - Observation and evaluation of newborn for suspected infectious condition ruled out.
• Categories P00, P01, P02, P03, P04 have the following new Excludes2 note:

  – Excludes2: encounter for observation of newborn for suspected diseases and conditions ruled out (Z05.-)
Chapter 16: Perinatal Conditions

Disorders of NB related to length of gestation & fetal growth (P05-P08)

• New Code
  – **P05.09** – Newborn light for gestational age, 2500 grams and over
    • Alphabetical Index
      – Newborn
        » Light-for-dates(infant)
          • With weight of
            • 2500 grams and over **P05.09**

• Note the description for P05.0
  • Weight below but length above 10\textsuperscript{th} percentile for gestational age
Chapter 16: Perinatal Conditions

- New Code
  - **P05.19** – Newborn small for gestational age, other
    - Alphabetical Index
      - Newborn
        » Small for dates (infant)
          • With Weight of
            • 2500 grams and over **P05.19**

- Note the description for P05.19
  • **Weight and length below 10\textsuperscript{th} percentile for gestational age**
Chapter 16: Perinatal Conditions

Alphabetical Index Changes:

• Hemorrhage, subgaleal P12.1
  – Revised to: P12.2
• Newborn apnea P28.3
  – Revised to: P28.4
• Newborn jaundice P59.8
  – Revised to: P59.9
• Observation, newborn
  – Carefully review the index entries
  – P code vs. Z code
Thank you for joining us for the FY 2017 ICD-10-CM Code Updates Webinar III!
FY 2017 ICD-10-CM Code Updates

Webinar IV

Presented by: Elaine Maldonado, RHIT
Manager Coding Compliance, Pomona Valley Hospital Medical Center
This webinar will cover:

Chapter 17: Congenital Malformations, Deformations and Chromosomal Abnormalities

Chapter 18: Symptoms, Signs, and Abnormal Clinical and Laboratory Findings, not Elsewhere Classified

Chapter 19: Injury, Poisoning and Certain Other Consequences of External Causes

Chapter 20: External Causes of Morbidity

Chapter 21: Factors Influencing Health Status and Contact with Health Services
Chapter 17: Congenital Malformations, Deformations & Chromosomal Abnormalities (Q00-Q99)
Chapter 17: Congenital Anomalies

New Codes:

• Q25.21 Interruption of aortic arch
• Q25.40-Q25.49 Other congenital malformations of aorta
  – Q25.4 was expanded to include new codes for improved specificity such as:
    • Congenital malformation of aorta, unspecified
    • Absence and aplasia of aorta
    • Hypoplasia of aorta
    • Congenital aneurysm of aorta
    • Congenital dilation of aorta

ahima.org/codeupdates
Chapter 17: Congenital Anomalies

- Code Q52.12 Longitudinal vaginal septum expanded to show laterality, obstruction and that with microperforate.

- New codes:
  - Q52.120 Longitudinal vaginal septum, non obstructing
  - Q52.121 Longitudinal vaginal septum, obstructing, right side
  - Q52.122 Longitudinal vaginal septum, obstructing, left side
  - Q52.123 Longitudinal vaginal septum, microperforate, right side
  - Q52.124 Longitudinal vaginal septum, microperforate, left side
New Codes:

• Code Q66.2 Congenital metatarsus (primus) varus, has been expanded to recapture specificity previously included in ICD-9-CM for the following conditions:
  – Q66.21 Congenital metatarsus primus varus
  – Q66.22 Congenital metatarsus adductus

• Code Q82.6 for Congenital sacral dimple
Alphabetic Index changes:

- Chondrodysplasia, metaphyseal Q78.5
  - Revised to: Q78.8
- Cyst, cervical lateral Q18.1
  - Revised to: Q18.0
- Dysplasia, craniometaphyseal Q78.5
  - Revised to: Q78.8
- Onycho-osteodysplasia Q79.8
  - Revised to: Q87.2
- Stenosis, aorta & Stricture, aorta Q25.3
  - Revised to: Q25.1
Chapter 17: Congenital Anomalies

Alphabetic Index changes:

- **Syndrome changes**
  - Bakwin-Krida Q79.8
    - Revised to: Q78.5
  - Danlos’ Q79.8
    - Revised to: Q79.6
  - Fong’s Q79.8
    - Revised to: Q87.2
  - Osterreicher-Turner Q79.8
    - Revised to: Q87.2
  - Sotos’ E22.0
    - Revised to: Q87.3
  - Turner-Kieser Q79.8
    - Revised to: Q87.2
Chapter 18: Symptoms, Signs & Abnormal Clinical & Laboratory Findings, not Elsewhere Classified (R00-R99)
Chapter 18: Signs and Symptoms

This chapter includes several Excludes1 notes changing to Excludes2 notes.

- R00 Abnormalities of heart beat
- R01 Cardiac murmurs & other cardiac sounds
- R93.4 Abnormal findings on diagnostic imaging of urinary organs
- R70-R79 Abnormal findings on examination of blood, without diagnosis
Nervous and Musculoskeletal System

- R29.700-R29.742 National Institutes of Health Stroke Scale (NIHSS) score
  - Codes added to report NIHSS scores
  - Systematic assessment tool to evaluate & document neurological status & stroke severity
  - NIHSS scores range from 0 - 42
    - Predicts lesion size
    - Measures severity of stroke
    - Predicts short and long term outcome of stroke
Chapter 18: Signs and Symptoms

Genitourinary System (R30-R39)

New Codes:

• R31.21, Asymptomatic microscopic hematuria (AMH)

• Expanded the codes for other difficulties of micturition
  – R39.191 Need to immediately re-void
  – R39.192 Position dependent micturition
  – R39.198 Other difficulties with micturition

• R39.82 Chronic bladder pain
Cognition, Perception, Emotional State and Behavior (R40-R46)

• Excludes1 note: Symptoms & signs constituting part of a pattern of mental disorder (F01-F99) changed to an Excludes2 note

• Glasgow Coma Score -
  – Category R40.2 Coma

  • Note revised to: One code from each subcategory, R40.21 – R40.23 is required to complete the coma scale
Chapter 18: Signs and Symptoms

Cognition, Perception, Emotional State and Behavior (R40-R46)

• 7th characters added for code R40.241-R40.244, total coma score, to report when the score was obtained.
  – 0 unspecified time
  – 1 in the field (EMT or ambulance)
  – 2 at arrival to emergency department
  – 3 at hospital admission
  – 4 24 hours or more after hospital admission
Example: Total Glasgow Coma Scale (GCS)
The patient arrived by ambulance following a motor vehicle accident. The total GCS was 8 when the patient arrived to the ER.

Report code R40.2432 for the total GCS
Chapter 18: Signs and Symptoms

Cognition, Perception, Emotional State and Behavior (R40-R46)

• Code R41.84 Other specified cognitive deficit
  – Excludes1 note added for cognitive deficits as sequelae of cerebrovascular disease

Abnormal findings on examination of blood without diagnosis (R70-R79)

• New code R73.03 for Prediabetes
Abnormal findings on examination of urine, without diagnosis (R80-R82)

- Added code R82.71 Bacteriuria
- Added code R82.79 Other abnormal findings on microbiological examination of urine
  (Includes positive culture of urine)
Chapter 18: Signs and Symptoms

Abnormal findings on diagnostic imaging (R90-R94)
Expanded R93.4 to show the genitourinary organs and laterality
  R93.41
  R93.421 – R93.429
  R93.49

Abnormal tumor markers (R97)
• Category R97.2
  – R97.20 Elevated prostate specific antigen (PSA)
  – R97.21 Rising PSA following treatment for malignant neoplasm of prostate
Chapter 18: Signs and Symptoms

Index changes:

- Findings, urine, bacteria N39.0
  – Revised to: R82.71

- Murmur, systolic (valvular) - see Endocarditis
  – Revised to: R01.1 in place of the see instruction
Chapter 19: Injury, poisoning and certain other consequences of external causes S00-T88
The following are expanded to include laterality:

- Fracture of base of skull (S02.-)
- Fracture of occiput (S02.11)
  
  **Revision**

  - S02.11A-S02.11H added to specify laterality for each type (I-III) occipital condyle fracture

Fracture of orbital floor (S02.3)

- Fracture of malar, maxillary & zygoma bones (S02.4)
- Fracture of mandible (S02.6)
- Fracture of other specified skull & facial bones (S02.8)
Dislocation and sprain of joints and ligaments of head (S03.-) expanded to include laterality

No Change

Revised from
Revised to

Dislocation (articular)
- jaw (cartilage) (meniscus) S03.0
- jaw (cartilage) (meniscus) S03.0-
- mandible S03.0
- mandible S03.0-
- temporomandibular (joint) S03.0
- temporomandibular (joint) S03.0-

S03.0 Dislocation of jaw
- S03.00 Dislocation of jaw, unspecified side
- S03.01 Dislocation of jaw, right side
- S03.02 Dislocation of jaw, left side
- S03.03 Dislocation of jaw, bilateral

S03.4 Sprain of jaw
- S03.40 Sprain of jaw, unspecified side
- S03.41 Sprain of jaw, right side
- S03.42 Sprain of jaw, left side
- S03.43 Sprain of jaw, bilateral
S06.0X Concussion
  – Deleted several 6 character codes
  – 3 codes left
    • S06.0X0- Concussion without LOC
    • S06.0X1- Concussion with LOC less than 30 minutes
    • S06.0X9- Concussion with LOC of unspecified duration
• Revised Excludes1 to include codes S06.1- to S06.6-, S06.81- and S06.82;
  – “Concussion with other intracranial injuries classified in subcategories S06.1- to S06.6-, S06.81- and S06.82-code to specified intracranial injury”
• S99 Other and unspecified injuries of ankle and foot – new codes (S99.001-S99.299)
  – Additional and revised 7th characters to indicate if the fracture is closed or open and the type of healing as routine healing, delayed healing, nonunion or malunion.
  – Category S99 expanded to allow classification of physeal (growth plate) and Salter-Harris fractures as well as capture laterality
• New codes have been added to identify specific conditions

  – T82.855- Stenosis of coronary artery stent
    Including:
    In-stent stenosis (restenosis) of coronary artery stent
    Restenosis of coronary artery stent

  – T83.856- Stenosis of peripheral vascular stent
    Including:
    In-stent stenosis (restenosis) of peripheral vascular stent
    Restenosis of peripheral vascular stent
Chapter 19: Injury, Poisoning & Certain Other Consequences of External Causes

Substantial code additions & revisions have been made for complications of specified devices (T83.-, T85.- categories)

Types of Complications
- Mechanical
- Displacement
- Leakage
- Breakdown
- Infection & inflammation
- Erosion of graft
- Stenosis
- Exposure
- Fibrosis
- Pain

New!

Types of Devices
- Indwelling urethral catheter
- Nephrostomy catheter
- Penile/testicular prosthesis
- Implanted electronic neurostimulator, generator
- Ventricular intracranial shunt
- Nervous system prosthetic devices
Displacement of Urinary (Indwelling) Catheter has been revised to:

- T83.02 Displacement of urinary (indwelling) catheter
- Malposition of urinary (indwelling) catheter
- Malposition of urinary catheter

- T83.021 Displacement of indwelling urethral catheter

- T83.022 Displacement of nephrostomy catheter

- T83.028 Displacement of other indwelling urethral catheter

- T83.028 Displacement of other urinary catheter
  - Displacement of Hopkins catheter
  - Displacement of ileostomy catheter
  - Displacement of urostomy catheter
Revisions have been made to the infections and inflammatory reaction due to urinary system device codes:

- **New code T88.53** Unintended awareness under general anesthesia during procedure.

### Revisions

**Revise from**
- T83.51 Infection and inflammatory reaction due to indwelling urinary catheter
- T83.51 Infection and inflammatory reaction due to urinary catheter

**Revise to**

- T83.510 Infection and inflammatory reaction due to cystostomy catheter
- T83.511 Infection and inflammatory reaction due to indwelling urethral catheter
- T83.512 Infection and inflammatory reaction due to nephrostomy catheter
- T83.518 Infection and inflammatory reaction due to other urinary catheter

- Infection and inflammatory reaction due to Hopkins catheter
- Infection and inflammatory reaction due to ileostomy catheter
- Infection and inflammatory reaction due to urostomy catheter

### New Codes
- T83.518 Infection and inflammatory reaction due to other urinary catheter
- Infection and inflammatory reaction due to Hopkins catheter
- Infection and inflammatory reaction due to ileostomy catheter
- Infection and inflammatory reaction due to urostomy catheter
Alphabetic Index changes:

- New subterm of ‘compression’ under Fracture, pathological.
  - Fracture, pathological, compression (not due to trauma) (see also Collapse, vertebra) M48.5-

- Fracture, traumatic – many new subterms

- Injury, gland, salivary S09.90
  - Revised to: S09.93

- Minamata disease T26.1
  - Revised to: T56.1
Alphabetic Index changes:

- Reaction, toxic, to local anesthesia T81.89
  - Revised to: T88.59

- The following index entries have been revised & now include new codes under the Sepsis subterm – due to device, implant or graft (T85.79):
  - Device, catheter, infusion, spinal T85.735
  - Electronic, nervous system T85.738
  - Ventricular intracranial shunt T85.730
Chapter 20:
External Causes of Morbidity (V00-Y99)
• The codes in the V47 category that specified the vehicle as an SUV or other type of car were deleted.

  V47.01 driver of SUV……..
  V47.02 drive of other type car…….

• The code was collapsed and revised to:

  V47.0 Car driver injured in collision with fixed or stationary object in nontraffic accident
External Cause Index changes:

- Accident, transport, motor vehicle NEC occupant (traffic) V86.39
  - The index lines referring to the type of driver have been removed (driver, passenger, etc.) Occupant will now be used instead.

V89.2 Person injured in unspecified motor-vehicle accident, traffic

- Accident, transport, occupant (of) minibus – see accident, transport, car occupant
  - Changed from car occupant to pickup truck occupant

- Also applies to minivan SUV and sports utility vehicle subterms
Chapter 20: External Causes

External Cause Index changes:

- Contact, with, can, lid W45.2 changed to W26.8
- Contact, with, edge of stiff paper W45.1 changed to W26.2
- Contact, with, paper W45.1 changed to W26.2
- Contact, with, tin can lid W45.2 changed to W26.8
External Cause Index changes:
Medical/Surgical Misadventure
• Cut, during medical or surgical treatment as misadventure – see Misadventure, cut, by type of procedure changed the “see” instruction to see Index to diseases and injuries, complications
• The same “see” instruction change was made for several other index entries such as:
  – Hemorrhage, delayed following medical or surgical treatment without mention of misadventure
  – Hemorrhage, during medical or surgical treatment as misadventure
  – Misadventure, to patient during surgical or medical care, hemorrhage
New Code category - Overexertion and strenuous or repetitive movements (X50)

- Much needed to cover causes such as:
  * Pulling, excessive
  * Straining, excessive
  * Strenuous movements
  * Twisting, excessive

External Cause Index changes:

- Exhaustion, due to excessive exertion – see Overexertion –
  - Changed to make the ‘see’ note a ‘see also’ and added X50.9 as the default code at this subterm
External Cause Index changes:

- Overexertion X50.9
  - from
    --prolonged static or awkward postures X50.1
    --repetitive movements X50.3
    --specified strenuous movements or postures NEC X50.9
    --strenuous movement or load X50.0
- Twisting, excessive – see Overexertion
  - Revised to: Twisting, (prolonged) (static) X50.1
External Cause Index changes:

• Place of occurrence; Residence, specified place in residence NEC Y92.009
  – Revised to: Y92.008

• Terrorism, hot substances Y38.5X
  – Revised to: Y38.3X

• Terrorism, specified method NEC Y38.8X
  – Revised to: Y38.89
Chapter 20: External Causes

External Cause Index changes:

- Choking Game
  Activity (involving) (of victim at time of event)
  Y93.9
  ADD – blackout game Y93.85
  ADD - choking game Y93.85
  ADD - fainting game Y93.85
  ADD – pass out game Y93.85
Chapter 20: External Causes

• The NOTES at the beginning of the External Cause chapter have been revised (explanations/definitions)
• W89 Exposure to man-made visible & ultraviolet light
  – Excludes2 changed to Excludes1: exposure to sunlight (X32)
• Y62-Y69 Misadventures to patients during surgical & medical care
  – Changed Excludes2 note to Excludes1 note
• Surgical & other medical procedures as the cause of abnormal reaction of the patient, or of later complication, without mention of misadventure at the time of the procedure (Y83-Y84)
  – Added Excludes2: breakdown or malfunctioning of medical device (Y70-Y82)
Chapter 21: Factors Influencing Health Status & Contact with Health Services (Z00-Z99)
New codes:

- **Z05.0 - Z05.9**: Encounter for observation & evaluation of newborn for **suspected** diseases and conditions **ruled out**

- **Z19.1** Hormone sensitive malignancy status

- **Z19.2** Hormone resistant malignancy status

- **Z29.11 - Z29.9**: Encounter for prophylactic measures
New Codes:

• **Z31.7**: Encounter for procreative management and counseling for gestational carrier
  – Excludes 1: pregnant state, gestational carrier (Z33.3)
• **Z33.3**: Pregnant state, gestational carrier
  – Excludes 1: encounter for procreative management & counseling for gestational carrier (Z31.7)
• **Z51.6**: Encounter for desensitization to allergens
• **Z79.84**: Long term use of oral hypoglycemic drugs
• **Z83.42**: Family history of hypercholesterolemia
• **Z84.82**: Family history of SIDS
• **Z92.84**: Personal history of unintended awareness under general anesthesia
Chapter 21: Factors Influencing Health Status & Contact with Health Services

New Codes:

- **Surrogacy**
  - Z31.7 Encounter for procreative management & counseling for gestational carrier
  - Z33.3 Pregnant state, gestational carrier

- ‘Scope’ procedures converted to open
  - Z53.31 Laparoscopic surgical procedure converted to open procedure
  - Z53.32 Thorascopic surgical procedure converted to open procedure
  - Z53.33 Arthroscopic surgical procedure converted to open procedure
  - Z53.39 Other specified procedure converted to open procedure
Chapter 21: Factors Influencing Health Status & Contact with Health Services

New codes:

- Z30.015 - Z30.018: Encounter for initial prescription of contraceptives
- Z30.44 - Z30.49: Encounter for surveillance of contraceptives
- Z98.890 - Z98.891: Other specified postprocedural states
  - Z98.890 Other specified postprocedural states
  - Z98.891 History of uterine scar from previous surgery
  
  Excludes1: Maternal care due to uterine scar from previous surgery (O34.2-)

Added Exclusion notes:

- Z87.41: Personal history of dysplasia of the female genital tract
  
  Excludes 1: personal history of intraepithelial neoplasia III of female genital tract (Z87.001, Z87.008)
Chapter 21: Factors Influencing Health Status & Contact with Health Services

Alphabetic Index Changes:

• Carrier of Viral Hepatitis Z22.50-Z22.59
  – Revised to: Chapter 1 (Infectious disease) codes B18.-

• Resistance, organism, to, drug (default code added)
  – Revised to: Z16.30

• Use of alcohol F10.99 code has been reindexed to a Z code
  – Z72.89 Other problems related to lifestyle
Thank you for joining us for the FY 2017 ICD-10-CM Code Updates Webinar IV!
FY 2017
ICD-10-CM Code Updates Webinars

Webinar series authors:

• Tracy Beach, RHIA - Independent Consultant LTPAC
• Leola Burke, MHSA, CCS – AHIMA Approved ICD-10-CM/PCS Trainer - Independent ICD-10 Consultant
• Megan DeVoe, CCS - Product Specialist, TruCode
• Elaine Maldonado, RHIT - Manager Coding Compliance, Pomona Valley Hospital Medical Center
• Shan S. Miller, RHIA – HIM Director, Liberty Healthcare & Rehab Services
• Stacey L. Murphy, MPA, RHIA, CPC – AHIMA Approved ICD-10-CM/PCS Trainer; Exam Prep Facilitator
• Patricia Trela, RHIA – Consultant, PATrela Consulting
• Kathryn Austin, RHIT, CCS, CCS-P, CPC – Director, HIM Practice Excellence, AHIMA
• Crystal Clack, MS. RHIA, CCS – Director, HIM Practice Excellence, AHIMA
• Donna J. Rugg, RHIT, CDIP, CCS – Director, HIM Practice Excellence, AHIMA

FY 2017
ICD-10-CM Code Updates Webinars

• ICD-10-CM Official Guidelines for Coding and Reporting FY 2016

Instructions: Select the best answer choice.

1. Which ICD-10-CM code is used to report Acute infectious hepatitis, NOS?
   - B18.9
   - B19.9
   - B17.9
   - B15.9

2. A new ICD-10-CM code D47.Z2 was created to identify Castleman Disease.
   - True
   - False

3. Gastrointestinal Stromal Tumors (GIST) are most commonly found in:
   - Children ages 5-12
   - Adults ages 21-30
   - Adults ages 40-70
   - Adults ages 75+

4. A patient suffering a seroma following an ophthalmic procedure would be assigned an ICD-10-CM code from subcategory:
   - H59.36-
   - H59.34-
   - H59.33-
   - H59.35-

5. We now have an ICD-10-CM code to reflect both conductive and sensorineural hearing loss in the right ear:
   - True
   - False

6. Vertical ridge deficiency may now be reported with which ICD-10-CM code?
   - K06.3
   - K06.8
   - K06.1
   - None of the Above

7. ICD-10-CM code K04.0 Pulpitis, has been broken out into three new ICD-10-CM codes:
   - True
   - False

Do not send a copy of completed self-assessments to AHIMA. Please keep them with your certificate of attendance, for your records.
8. Some additions made in Chapter 13 included adding new ICD-10-CM codes for bunions, hand joint pain, and lumbar disk disorders.
   □ True
   □ False

9. ICD-10-CM codes for urinary urgency are now located in what chapter
   □ Chapter 21
   □ Chapter 18
   □ Chapter 4
   □ Chapter 14

10. ICD-10-CM code N39.0 *Urinary tract infection, site not specified* will no longer include the conditions of bacilluria and bacteriuria?
    □ True
    □ False

11. A patient taking an oral antidiabetic medication, such as Metformin, would have the ICD-10-CM code Z79.84 assigned?
    □ True
    □ False

12. To report a patient’s use of alcohol, an ICD-10-CM code would be assigned from which chapter?
    □ 21
    □ 16
    □ 3
    □ 5

13. ICD-10-CM codes have now been created to report which stages of periodontitis:
    □ Slight, Moderate
    □ Slight, Severe
    □ Slight, Moderate, Severe
    □ Slight, Moderate, Severe, Unspecified

14. Subterm --major neurocognitive disorder, amnestic confabulatory type has been added under the main index term Alcohol, alcoholic, alcohol-induced
    □ True
    □ False

---

Do not send a copy of completed self-assessments to AHIMA. Please keep them with your certificate of attendance, for your records.
15. The subterm --Phencyclidine intoxication (acute), is found under which main index term?
- Hallucinogen
- Dependence
- Delirium
- Disturbance

16. The main index term Disorder (of) - see also Disease, includes several new subterms. Please select one or more of the new subterm(s) from the choices below.
- Amphetamine – type substance use
- Drug Use
- Acantholytic
- Alcohol Use

17. If the physician documentation specifies diabetes mellitus is not the underlying cause of the other condition, the condition should be coded as a diabetic complication.
- True
- False

18. Category E78.0 Pure and familial hypercholesterolemia, now has how many unique ICD-10-CM codes?
- One
- Two
- Three
- Four

19. The ICD-10-CM codes for dislocation and sprain of joints and ligaments of the jaw are now expanded to include laterality.
- True
- False

20. What verbiage was removed from the ICD-10-CM code descriptions for the P00-P04 range?
- Rule-Out
- Suspected
- Excludes
- Excludes 2

21. New Excludes2 instructional notes have been added to categories P01, P02, P03, and P04 in Chapter 16.
- True
- False

Do not send a copy of completed self-assessments to AHIMA. Please keep them with your certificate of attendance, for your records.
22. What inclusion terms have been added to the tabular book for ICD-10-CM code P05.0?
- □ Weight above but length below 10th percentile for gestational age
- □ Weight above and length above 10th percentile for gestational age
- □ Weight below and length below 10th percentile for gestational age
- □ Weight below but length above 10th percentile for gestational age

23. What inclusion terms have been added to the ICD-10-CM tabular book for category code P05.1?
- □ Weight above but length below 10th percentile for gestational age
- □ Weight and length above 20th percentile for gestational age
- □ Weight and length below 10th percentile for gestational age
- □ Weight and length above 10th percentile for gestational age

24. The ICD-10-CM External Cause of Injury index entry Contact (accidental), with, edge of stiff paper was changed from W45.1 to:
- □ W45.2
- □ W26.8
- □ W26.2
- □ None of the Above

25. The main index term Meningitis has ______ new index entry(s) and _____ revision(s):
- □ 2; 3 revisions
- □ 1; 1 revision
- □ 3; 2 revisions
- □ 3; 1 revision

26. Select the most accurate statement for the index changes relating to MMN (multifocal motor neuropathy) G61.82.
- □ This is a revised entry
- □ This is a deleted term entry
- □ This is a new main term entry
- □ None of the above

27. The subterm -- interdigital, lower limb found under main index term Neuroma-see also Neoplasm, nerve, benign; has been revised.
- □ True
- □ False

Do not send a copy of completed self-assessments to AHIMA. Please keep them with your certificate of attendance, for your records.
28. *Subterm Pneumococcal streptococcus pneumonia* (G00.1) is a __________ index entry under the main index term *Meningitis*.

- New
- Revised
- Old
- Deleted

29. *Mast Cell Activation Syndrome (MCAS)* is an immunological condition with signs and symptoms involving the: ____________, ____________, ____________, ____________, and ____________ systems.

- Skin, gastrointestinal, cardiovascular, respiratory and genitourinary systems
- Skin, gastrointestinal, cardiovascular, respiratory and circulatory systems.
- Skin, gastrointestinal, cardiovascular, respiratory and neurologic systems.
- Skin, genitourinary, cardiovascular, respiratory and neurologic systems.

30. It is appropriate to query the physician when the coder is unable to determine whether a condition is related to diabetes mellitus or the ICD-10-CM classification does not provide coding instruction.

- True
- False

31. A 25-Year-old pregnant female (19 weeks of gestation) presents with persistent abdominal pain. Ultrasound examination confirms that a tubal pregnancy, (without intrauterine pregnancy), is the source of the abdominal pain. What ICD-10-CM code(s) are assigned?

- O00.10 and Z3A.00
- O00.11 and Z3A.19
- O00.10
- O00.10 and Z3A.19

32. New ICD-10-CM codes for third degree perineal lacerations complicating delivery have been created to capture the grade information of the laceration. Grade IIIa is defined as:

- less than 50% of external anal sphincter (EAS) thickness torn
- more than 50% external anal sphincter (EAS) thickness torn
- both external anal sphincter (EAS) internal anal sphincter (IAS) torn

33. Gestational diabetes mellitus in pregnancy, controlled by oral hypoglycemic drugs may now be reported using the following ICD-10-CM code.

- O24.415
- O24.425
- O24.119
- O24.011

---

Do not send a copy of completed self-assessments to AHIMA. Please keep them with your certificate of attendance, for your records.
34. Carpal tunnel syndrome of both arms is reported with ICD-10-CM code:
   - G56.00
   - G56.02
   - G57.03
   - G56.03

35. ICD-10-CM code L98.1 Factitial dermatitis does not exclude ICD-10-CM code F42.4 Excoriation (skinpicking) disorder
   - True
   - False

36. Periprosthetic hip fractures can be found in which category of the tabular ICD-10-CM book?
   - M96.8
   - T84.1
   - M97.0
   - T80.4

37. The ICD-10-CM code for the congenital malformation Chondrodysplasia, metaphyseal is?
   - Q18.1
   - Q79.8
   - Q78.5
   - Q78.8
